- (a) receiving a digital image of a document associated with a document type, the digital image including a plurality of black and white pixels arranged in rows;
- (b) locating at least two predefined portions of the digital image;
- (c) calculating an area confidence level for each of the predefined portions of the digital image as a function of a total number of black pixels located in the predefined portion relative to an expected number of black pixels for the predefined portion;
- (d) calculating a text confidence level as a function of a total number of pixel groups relative to a total number of characters, wherein each pixel group comprises a set of touching black pixels and each character comprises one or more pixel groups, wherein calculating the text confidence level comprises:
 - subtracting the total number of characters from the total number of Pixel groups to produce a first quantity,

dividing the first quantity by the total number characters to produce a second quantity, and

subtracting the second quantity from 1 to produce a text confidence level, and if the text confidence level is negative, setting the text confidence level equal to 0;

(e) calculating an image profile confidence level as a function of a black pixel distribution and a black pixel density;

(f) calculating an overall image confidence level as a function of the area confidence level the text confidence level, and the image profile confidence level; and

(g) storing the digital image as a result of determining that the overall image confidence level is greater than or equal to a threshold value associated with the document type of the image.

In claim 18, please replace the subject matter in the claim with the following:

18. A method, comprising:

determining that a first overall confidence level of a first digital image of a document associated with a document type is less than a threshold value associated with the document type;

receiving a second digital image of the document, the digital image including a plurality of black and white pixels arranged in rows;

locating at least two predefined portions of the second digital image;

calculating an area confidence level for each of the predefined portions of the second digital image as a function of a total number of black pixels located in the

calculating a text confidence level as a function of a total number of pixel groups relative to a total number of characters, wherein each pixel group comprises a set of touching black pixels and each character comprises one or more pixel groups, wherein calculating the text confidence level comprises:

subtracting the total number of characters from the total number of pixel groups to produce a first quantity,

dividing the first quantity by the total number characters to produce a second quantity, and

subtracting the second quantity from 1 to produce a text confidence level, and
if the text confidence level is negative, setting the text confidence level equal to 0;

calculating an image profile confidence level as a function of a black pixel distribution and a black pixel density;

calculating a second overall image confidence level as a function of the area confidence level, the text confidence level, and the image profile confidence level; and

storing the second digital image as a result of determining that the second overall image confidence level is greater than or equal to the threshold value.

REASONS FOR ALLOWANCE

Art Unit: 2624

3. The following is an examiner's statement of reasons for allowance: In addition to the teachings of the claims 1 and 18, as whole, closet art of record failed to teach or suggest among other thing,

" wherein calculating the text confidence level comprises:

subtracting the total number of characters from the total number of pixel groups to produce a first quantity,

dividing the first quantity by the total number characters to produce a second quantity, and

subtracting the second quantity from 1 to produce a text confidence level, and if the text confidence level is negative, setting the text confidence level equal to 0."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Claims 1-2, 5-7, 9-11,18-19, and 22-26 (now renumbered 1-15 for issue) are allowed over the prior art of record.
